Gentlemen,

I was requested to get a situational update on to where the 8/13 and 8/14 sampling data is in the process.

Thanks

Thanks Brad - this is very helpful. So then my point of contact is Ian and I should be checking with him on status. Once I receive we review and forward, correct?

It sounds like Ian would know the publication schedule. I think I get it. Thanks again.

We are generating nightly reports in the format specified by the Data Team and HQ once all validated data is loaded and sending them to the REOC EU for review. Those reports were just generated and will be coming soon. Once you review my understanding is you send to HQ EU for review.

Ian Bruce is our data lead for R9 and is in the field and will be publishing the analytical results and producing the reports moving forward. So he can help answer questions as well. Please call my cell if we need to chat more.

Thanks

Thanks Eric. Public site looks good with the viewer. Thanks for that.

We were expecting a table to share with you all for 8/13 and 14. We had validated data tables we worked with today but we were expecting a table in a format suitable for presentation.

We did not see this so we're very confused about what our role is and what our expectations should be. Any idea where we might have gone wrong?

At this stage the release of this data is the highest Regional priority.

Let me know our thoughts.

Harry

Harry,

The DATA team is working a process to track when data is submitted to HQ EOC for review then ultimately posted to the .gov site.

This process will help us update the public geospatial viewer that is currently embedded in the [EPA.gov](http://EPA.gov) Gold King Mine site.

Thanks

Harry,

Eric was asking who from your team is submitting these to the HQ EOC for review?

Thanks,

Ok - that's good news and what I was most concerned about. I'll be patient for the 8/13 table.

Thanks for the update

That is suppose to happen in the Region 9 ICP, I don't understand what is taking them so long. If need be we can see what resources are available to assist your ICP for this project.

8/12 surface water samples were sent to Terry this afternoon to be posted.

Hi all.

Any sense of when our 8/13 tables will be provided? What about 8/12? We are frustrated that we haven't seen these because of extremely high priority on their release to the Navajo Nation. Any insight you can offer is appreciated.

Thank you.

The 8/13 data is with the table formatting person. The 8/14 data had some questions come up and went back to the validator. I should be seeing that data before cob.

Thanks,

Patty

I'm looking for validated 8/14 data from San Juan River sampling – do you know if available, and if so where?

Thanks, Gerry
